Investment Frequency: Daily

Financial Results

Total Invested: \$80820.00

Final Portfolio Value: \$590372.71

Total Profit: \$509552.71

Investment Strategy

The Dollar-Cost Averaging (DCA) strategy involves investing a fixed amount of money into Bitcoin at regular intervals. This method aims to reduce the impact of volatility by spreading out purchases over time, potentially leading to a more stable average entry price.

Bitcoin DCA Backtest Report

Conclusion

This backtest demonstrates the potential of DCA as a long-term investment strategy. While short-term fluctuations are inevitable, disciplined investing over time can provide stable growth in a volatile market.
